DETAILED ACTION

Response to Argument

Applicant's arguments with respect to claim 1 have been considered with the following effect;

The applicant argues that the probes 26 and 28 in the reference, taken by the examiner as the "probes drooping vertically", do not appear to droop vertically from the mounting block 30. The examiner is respectfully traversed this argument. The probes 26 and 28 in all the figures so the bending section because they are come into contact with device under test at the time. Further, the layers 56 and 58 are coating layers which have no indication whatsoever in the reference to indicated that those layers are permanently coating.

As explained in detail above, the amendments do not render the claims distinct and patentable over prior art; nor do the amendments overcome the rejection. The applicant's arguments have considered in full, but they are unpersuasive. Therefore, this final rejection is made.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2829

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Thiessen et al (US 6297657).

As to claim 1, Thiessen et al discloses (figs 3 -6)

A vertical probe card (figs 3 -6) having vertical probes (26, 28) for use in measurement of electric characteristics of the objects (14) of measurement including

A main substrate (30) forming conductive patterns, a plurality of probes (26,28) drooping vertically from main substrate (30), and a probe support (40) provided at the back side of main substrate (30) for supporting probes (26, 28), wherein probe support (40) is disposed parallel to main substrate (30), and has an upper guide plate (42) and a lower guide plate (44) for supporting the probes (26, 28) by passing the through holes (43, 45) opened in each, said lower guide plate (44) is composed of a plurality of laminated substrates (44, 58, 56), and said plurality of substrates (44, 56, 58) can be separated one by one from the lowest layer to keep a necessary length of a leading end contact part of probes in case of wear.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
